The „LINEA“-range: energy and design on your command!

- 1 Feel free to choose for your individual material and colour. Then we will design the side walls exactly according to your demands: colour-binding (RAL).
- 2 Also the front panels are adjusted to side walls and your interior design.
- 3 The centre bar offers you even more individuality. Stone, wood, stainless steel – anything goes!
- 4 Choose for your cover plate from hundreds of variations available. What about shale, marble or freestone?
- 5 Our wicket door range crowns your personal chimney. Coloured (RAL), stainless steel or brass - as standard, round form or prism/oriel, maybe as “push up” variation? It's up to you!

Dimension:

Your strength is inbuilt!

Both innovation and established technology – that's what Normatherm© stands for: First class quality of manufacturing and optimum system technology gain for perfect energy efficiency and security. Thousands of satisfied owners do testify: please ask for personal references!

The LINEA range offers you a “as much as possible” choice. All system advantages remain, including panoramic window and maximum firing capacity.

Examples:

- stainless steel variation with perforated plate and marble tops
- marble plate with wooden inlay and coated side covering
